Dear Professor, Mr. K.A.Brylev
Director
Nikolaev Institute of Inorganic Chemistry
Siberian Branch of Russian Academy of Sciences

On behalf of Shenyang University of Chemical Technology, I would like to express my sincere congratulations and best wishes on the 65th anniversary of the foundation of the Nikolaev Institute of Inorganic Chemistry, Siberian Branch of Russian Academy of Sciences.

The Institute of Inorganic Chemistry is one of the most influential international scientific research centers in the field, and its achievements have won high reputation worldwide. Over the past 65 years, the institute has gained great achievements in scientific research, technological transformation and talents training.

Thirty years ago, Professor Kuznetsov and our university started the long-lasting friendship between us. Since 2017, your institute, especially Professor Fedin, has been working closely with our university to establish the Russian Research Center and Russian Academician Research Laboratory in SYUCT, which has greatly expanded the cooperation between two organizations.

The world is going through unprecedented changes and challenges. Under such circumstances, the Sino-Russia cooperation in areas such as research and education has become increasingly stable and valuable. We hope and firmly believe that in the future we will continue our comprehensive cooperation and achieve more in all fields.

On this occasion of the 65th anniversary, we wish the Institute of Inorganic Chemistry more successful future with outstanding achievements! We also wish all teachers and students good health! May our friendship last forever!

Your faithfully,

Dr. Guangwen Xu
Professor, President, FREng
Shenyang University of Chemical Technology
