

## Выборочный список публикаций Яхварова Д.Г. за последние 5 лет

1. Yakhvarov D.G., Gorbachuk E.V., Sinyashin O.G. (2013) Electrode reactions of elemental (white) phosphorus and phosphane  $\text{PH}_3$ , *European Journal of Inorganic Chemistry*, 27, 4709-4726.
2. Ganushevich Y.S., Miluykov V.A., Polyancev F.M., Latypov Sh.K., Lönnecke P., Hey-Hawkins E., Yakhvarov, D.G., Sinyashin, O.G. (2013) Nickel phosphanido hydride complex: an intermediate in the hydrophosphination of unactivated alkenes by primary phosphine, *Organometallics*, 32, 3914-3919.
3. Begantsova Y.E., Bochkarev L.N., Ketkov S.Y., Baranov E.V., Bochkarev M.N., Yakhvarov D.G. (2013) Synthesis, characterization and photophysical properties of new cyclometallated platinum(II) complexes with pyrazolonate ancillary ligand, *Journal of Organometallic Chemistry*, 733, 1-8.
4. Trofimova E., Dobrynin A., Gerasimova T., Katsyuba S., Sinyashin O., Yakhvarov D. (2013) Synthesis, X-Ray crystal structure and quantum-chemical study of new dinuclear cobalt complex  $[\text{Co}_2(\mu\text{-O}_2\text{P}(\text{H})\text{Mes})_2(\text{bpy})_4]\text{Br}_2$  (Mes = 2,4,6-trimethylphenyl, bpy = 2,2'-bipyridine), *Mendeleev Communications*, 23, 135-136.
5. Yakhvarov D.G., Petr A., Kataev V., Büchner B., Gómez-Ruiz S., Hey-Hawkins E., Kvashennikova S.V., Ganushevich Yu.S., Morozov V.I., Sinyashin O.G. (2014) Synthesis, structure and electrochemical properties of the organonickel complex  $[\text{NiBr}(\text{Mes})(\text{phen})]$  (Mes = 2,4,6-trimethylphenyl, phen = 1,10-phenanthroline), *Journal of Organometallic Chemistry*, 62, 2472-2476.
6. Yakhvarov D.G., Khusnuriyalova A.F., Sinyashin O.G. (2014) Electrochemical synthesis and properties of organonickel  $\sigma$ -complexes, *Organometallics*, 33, 4574-4589.
7. Gorbachuk E.V., Khayarov Kh.R., Sinyashin O.G., Yakhvarov D.G. (2014) Effect of a sacrificial anode material on the electrochemical generation of phosphane oxide ( $\text{H}_3\text{PO}$ ), *Mendeleev Communications*, 24, 334-335.
8. Basvani K.R., Fomina O.S., Yakhvarov D.G., Heinicke J. (2014) Synthesis and properties of zwitterionic phosphonioglycolates, *Polyhedron*, 67, 306-313.
9. Ghalib M., Lach J., Fomina O.S., Yakhvarov D.G., Jones P.G., Heinicke J. (2014) Benzazaphospholine-2-carboxylic acids: Synthesis, structure and properties of heterocyclic phosphanyl amino acids, *Polyhedron*, 77, 10-16.
10. Bochkarev L.N., Bariniva Y.P., Ilicheva A.I., Ketkov S.Y., Baranov E.V., Ilichev V.A., Yakhvarov D.G. (2015) Synthesis, crystal structures and luminescent properties of the copper(I) pyrazolonate complexes, *Inorganica Chimica Acta* 425, 189-197.

11. Yakhvarov D.G., Trofimova E.A., Dobrynin A.B., Gerasimova T.P., Katsyuba C.A., Sinyashin O.G. (2015) First neutral dinuclear cobalt complex formed by bridging [ $\mu$ -O<sub>2</sub>P(H)R]<sup>-</sup> ligands: synthesis, X-ray crystal structure and quantum-chemical study, *Mendeleev Communications*, 25, 27-28.
12. Gorbachuk E.V., Badeeva E.K., Zinnatullin R.G., Pavlov P.O., Dobrynin A.B., Gubaidullin A.T., Ziganshin M.A., Gerasimov A.V., Sinyashin O.G., Yakhvarov D.G. (2016) Polymorphism and thermodynamic properties of chloro(cyclopentadienyl)bis(triphenylphosphine)ruthenium(II) complex, *Journal of Organometallic Chemistry*, 805, 49-53.
13. Bailey W., Luconi L., Rossin A., Yakhvarov D., Flowers S., Kaminsky W., Kemp R., Giambastiani G. and Goldberg K. (2015) Pyrazole-Based PCN Pincer Complexes of Palladium(II): Mono- and Dinuclear Hydroxide Complexes and Ligand Rollover C–H Activation, *Organometallics*, 34, 3998-4010.
14. Tuci G., Luconi L., Rossin A., Berretti E., Ba H., Innocenti M., Yakhvarov D., Caporali M. Pham-Huu C. and Giambastiani G. (2016) Aziridine-Functionalized Multiwalled Carbon Nanotubes: Robust and Versatile Catalysts for the Oxygen Reduction Reaction and Knoevenagel Condensation, *ACS Appl. Mater. Interfaces*, 8, 30099-30106.
15. Khusnuriyalova A.F., Babaev V.M., Rizvanov I.K., Metlushka K.E., Alfonsov V.A., Sinyashin O.G., Yakhvarov D.G. (2017) Tracking of the formation of binuclear nickel complexes of [Ni<sub>2</sub>( $\mu$ -O<sub>2</sub>PR<sub>1</sub>R<sub>2</sub>)<sub>2</sub>(bpy)<sub>4</sub>]Br<sub>2</sub> type by ESI and MALDI mass spectrometry, *Polyhedron*, 127, 302-306.
